## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 & 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Ikeda et al. U.S. Patent 6,240,637.

Ikeda teaches a battery case comprising a stage having two opposite side walls (8) comprising each installed a clamping member having two opposite lateral sides (A) and (D) with wing portions (E) and (B) with a through hole (C) wherein corresponding fixing members may pass. The wing portion inherently contains a screw thread which provide indents on the side of the through hole.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pavlov et al. U.S. Patent 6,509,118, in view of Ikeda et al. U.S. Patent 6,240,637.

Pavlov teaches a battery comprising electrodes disposed across opposite side walls (Fig. 1).

The reference does not disclose the security feature of claim 1.

Ikeda teaches a battery case as described hereinabove in order to firmly secure the battery case in position.

However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the security means of Ikeda in the battery of Pavlov, in order to firmly secure the battery case in position.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ikeda et al. U.S. Patent 6,240,637 in view of Meggiolan U.S. Pub. 2002/0094474.

Ikeda teaches a battery case as described hereinabove in order to firmly secure the battery case in position.

The reference is silent to employing projection rings on the side of the through hole.

Meggiolan teaches that rings are conventionally used around the recesses for receiving axially locking structures to hold screws in place.

Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the rings of Meggiolan in the screw holes of Ikeda, in order to firmly hold the screws in place.

**Conclusions**

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Monique Wills whose telephone number is (703) 305-0073. The Examiner can normally be reached on Monday-Friday from 8:30am to 5:00 pm.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0661.

If attempts to reach Examiner by telephone are unsuccessful, the Examiner's supervisor, Randy Gulakowski, may be reached at 703-308-4333.

The unofficial fax number is (703) 305-3599. The Official fax number for non-final amendments is 703-872-9310. The Official fax number for after final amendments is 703-872-9311.
